

Dura-Tech Fiberglass Duct for Corrosion Environments

High Performance Fiberglass Duct

FEATURES

- CORROSION RESISTANCE
- EASE OF INSTALLATION
- LIGHT WEIGHT
- QUALITY CONSTRUCTION
- VERSATILITY
- STRENGTH
- EASY TO SHIP
- INSULATION OPTION

BENEFITS

- COST EFFECTIVE
- GUARANTEED FIT
- EASILY INSTALLED
- LONG LASTING
- PROVEN QUALITY

Built to ASTM 3982-08 standards for Glass Fiber Reinforced Thermosetting Resin Ducts. Our duct is built in strong light weight sections to be installed at the site. The sections are designed to minimize joints and yet ease installation and handling.

Dura-Tech offers complete packages from the design and fabrication of our standard or insulated duct to fit to your existing installed air treatment equipment.

- Ducting to your requirements or specifications
- Designed to minimize work on site
- We provide fully experienced technicians to carry out a full installation or assist you to assure your installation runs smoothly
- Standard sizes up to 96" (custom and larger sizes are also available)

Fiberglass Reinforced Plastic (FRP) duct products from Dura-Tech is the ideal choice for Wastewater Treatment Plant applications. Our Class 1 rated ductwork is unique in the industry and has widespread acceptance.

Fast on site seaming of duct allows for exact fit to valves, fans, scrubbers and vents.

After a quick installation, this duct is dependable, worry free, and can be relied upon for a longer service life than other ducting products, especially in corrosive environments.
